ENERGY MEASURES

Reduced Window to Wall Ratio
Reflective Paint/Tiles for Roof
Insulation of Roof
Insulation of External Walls
High Efficiency Boiler for Water Heating
Energy Saving Light Bulbs for Internal Spaces
Energy Saving Light Bulbs for External Areas
Solar Photovoltaics

WATER MEASURES

Low-Flow Showerheads
Low-Flow Faucets
Dual Flush Water Closets
Water-Efficient Urinals
Water-Efficient Faucets for Kitchen Sinks
Rainwater Harvesting System

MATERIALS

Floor Slabs - In-Situ Reinforced Concrete Slab
Roof Construction - In-Situ Reinforced Concrete Slab
Roof Construction - In-Situ Reinforced Concrete Slab
External Walls - Medium Weight Hollow Concrete Blocks
External Walls - Cored (with Holes) Bricks with Internal & External Plaster
Internal Walls - Medium Weight Hollow Concrete Blocks
Internal Walls - Cored (with Holes) Bricks with Plaster on Both Sides
Flooring - Ceramic Tile
Flooring - Finished Concrete Floor
Window Frames - Aluminium

The EDGE standard requires 20% efficiencies in energy, water and materials compared to a local benchmark. Predicted efficiencies are not a guarantee of future operational performance. Energy savings may be associated with virtual energy for comfort depending on the presence of heating and cooling systems. Virtual energy does not contribute savings to utility bills.

This certificate is issued by the Certifier based on information provided by the client and the audit by the Auditor, and is subject to the terms and conditions of the Certifier. Contact edge@ifc.org if the above measures are not consistent with your observation on the project.
